

WE BRING YOU THE WILDERNESS

Burpee brings the adventure of a field trip into your school!!

ANTHROPOLOGY NATURAL SCIENCE DINOSAURS ANIMALS CONSERVATION RESEARCH SURVIVE

Reserve your date today to bring the natural sciences alive in your school. The excitement of hands on science is met with a variety of programs from animals to dinosaurs, from minerals and gems to native american history.

Calling Learners of All Ages!

Textbook photos and videos are great ways to start the conversation about natural sciences. Yet nothing replaces experiences. Kids are never too young to begin hands on, face-to-face science. We are excited to offer new opportunities to immerse students in the natural sciences from single classroom on-site visits to whole school events where all students in the building rotate through thematic stations adapted for each grade level. See all of our themes at Burpee.org

THEME: WHAT'S IN THAT DIRT!?

It's time to dig our hands into the dirt. From experiments testing your worm's sense of smell and sight, and understanding their habitats, to uncovering bones and fossils buried deep in the Earth, we begin to understand the mysteries that lie beneath our feet.

THEME: HIBERNATION STATIONS

As the days get colder, the animals around us have amazing survival strategies to make it through the winter. Examine species in winter, pass the sniff test and test our different pelts and layers of fat to learn about how animals make it through the winter.

THEME: UNDER THE WATER

The local waterways are alive with animals, plants, and even more. Hold and touch some of the creatures that make up these ecosystems! Experiment with water testing on the Rock River, make filters and water bottles. Take action for water quality!

ENVIRONMENTAL IMPACT

How are we impacting our environment? Let's look at what happens to our garbage and how our choices change our world. Examine a case study of the Monarch butterfly and local plants. Learn how you can take action helping local populations.

Don't see what you are looking for? With only 10% of our collections on display, Burpee Museum has so much more than meets the eye to help you explore many different topics from history to science. Go online for more... or contact us and our educators will work to meet your needs.
